

Sekonic Data Transfer Software Now Compatible with Macintosh OSX 10.11 El Capitan and Windows 10

Sekonic has released new Data Transfer Software^{*1} version 5.01 for Apple Macintosh OS 10.11 El Capitan and Windows 10.

- The current Data Transfer Software v 5.00 is compatible with L-478 series meters, however, its USB driver is not compatible for L-758 series.

Customers who have already installed Data Transfer Software version 5.00, can use the “Update Settings” tab in the program to update to version 5.01.

Customers who have Data Transfer Software version 4.0 or earlier for Macintosh and version 3.09 or earlier for Windows, must completely uninstall any previous versions, and download the new installer available on Sekonic.com to install Data Transfer Software version 5.01.

We apologize for the delay and thank you for your patience. And we thank you for your continued use of Sekonic products.

*1 - - - Data Transfer Software is a Sekonic designed software application that is used to create camera exposure profiles, and calibrate Sekonic L-758 DIGITALMASTER series and L-478 LITEMASTER PRO Series meters. It is included on a CD-ROM in the standard packaging of these meters and as a free download on Sekonic.com.
