

C-700/C-700R Firmware Version

December 05, 2016

Firmware version number can be checked in "Product Information" in **Main & Sub Program** "Setting" in C-700 series

- JT10 C-700 with Lux reading only (Other countries than US and UK)
- JT12 C-700 with Lux and Foot-Candle reading (US and UK only)
- JT21 C-700R for CE frequency with Lux reading only
- JT22 C-700R for FCC & IC frequency with Lux and Foot-Candle reading

Date	Main No.	Sub No.	Contents
2015/12/2	10		Mass production version
2015/1/27	11	10	Additional functions and bug fixing
			1) Add the checker function (engineer tool)
			2) Change how to display Filter Number
			3) Change the process of spike judgement (pixel unit to 1nm step)
2015/2/16	12	10	4) Display the unit of measurement in delta function.
			Additional functions and bug fixing
			1) Add Chinese language
			2) Add the function to retain LVF lot number
			3) Bug fixing in Dimmer function
2015/3/9	13		4) Add the auto dimmer and auto power off function in USB bus power connection to prevent LCD burning.
			5) Bug fixing for all Flash Measuring Mode (bug was the reading is displayed even if over value.)
2015/3/25	14		Bug fixing
			1) Bug fixing in Memory Recall after measurement of Over/Under.
2015/7/13	20		Bug fixing
			1) Bug fixing in CRI value in Film mode (it should be same as Digital mode).
			Additional functions and bug fixing
			1) Improve the sensitivity of LCD touch panel
			2) Change the condition when dark calibration is required (to skip unnecessary dark calibration)
			3) Dark calibration can be made by rotating Light Selection Ring to CAL position
			4) Change the color of letter for unit when numeric letter is input
			5) Add QWERTY keyboard for input screen
			6) Filter brand can be changed in the Measuring screen
			7) Add the combination of filters (same two filters)
			8) Integrate Memory Recall, Rename and Delete into "Memory management".
			9) Add the pop-up message when memory is stored (when pressing Memory button)
			10) Last measurement can be memorized after the power OFF and ON.
			11) Memory title is displayed in memory recall mode.
			12) Change the specification of Multi Lights Mode.
			13) "BA" and "GM" for WB correction in Setting mode is changed to "Blue/Amber" and "Green/Magenta".
			14) More grid line in Spectrum Graph
			15) Item of color temperature in Film mode is changed to PCT (Photographic Color Temperature).
			16) Change the display range of delta uv from +/-0.3 to +/-0.1.
17) The bug is fixed that both Range L and H icon on the status bar of LCD are displayed when rotating the Light Selection Ring fast.			
18) The faulty is fixed that readings between Cord Flash Mode and Cordless Flash Mode are different much.			
19) The bug is fixed that the position of cursor on confirmation screen in touch panel adjustment is wrong.			
2015/7/24	21	11	Bug fixing
			1) Data of Over/Under is stored in memory after power ON.
2015/8/12	22		2) "Over" is not displayed even if output power is more than highest range of Range L (640lx·s)
			Additional functions and bug fixing
2015/9/15	23		1) Display KC regulation mark in the meter of "Setting" page.
			2) The bug of flash range NG is fixed.
			Improvements
2016/3/14	24		1) Improve the LED measurement
			Additional functions and bug fixing
			1) The bug is fixed that the measurement is not good when the batteries are dying.
			2) Display the warning when the batteries dye and the meter is turned off.
			3) The bug is fixed that auto power off is activated even if pressing measuring button to make ready-to measure time longer.
			4) The bug is fixed that radio flash triggering is not activated in Multi-Lights mode.
2016/5/13	25		5) USB device request (clear feature)
			6) Other small bugs are fixed.
			Additional functions and bug fixing
			1) Add "C-700-U" model name in the product line.
2016/12/5	26		2) Change the specification of filter display in digital mode.
			3) Change the specification of Multi Lights (filter combination) in digital mode. ready-to measure time longer.
			4) Other small bugs are fixed.
			Additional functions and bug fixing
			1) CC filter value in Film mode is fixed.
			2) The bug is fixed that the memory recall does not work properly.
